SHIPPING POINTS:
LENOIR, N. C.
ELKLAND, N. C.

SPECIALTIES:
AZALEA, HEMLOCK,
RHODODENDRON

PRICE LIST - - - - SPRING 1930

TO THE TRADE:

Herewith is our offering of native collected stock for Spring 1930.

We have specialized in the collecting of native plants for a number of years, and our experience along this line enables us to offer you a dependable service.

In regard to the quality of our plants: Azaleas are balled and burlapped and have from five to fifteen stalks to each plant. This applies to the Azalea calendulacea. The Azalea nudiflora and Azalea arborescens have from four to ten stalks.

Our Rhododendrons are all well balanced plants with good foliage, dug with heavy balls and have from six to fifteen stalks or more to the plant. The Rhododendron carolinianum is balled and burlapped but Rhododendron catawbiense and Rhododendron maximum are dug with balls but not burlapped, as we are able to dig these plants under conditions where the soil will adhere to the roots sufficiently without being burlapped. If desired Rhododendron maximum and catawbiense will be burlapped at an extra cost of ten cents per plant.

	1-2 ft.	2-3 ft.	3-4 ft.	4-6 ft.	6-8 ft.
Azalea calendulacea, B&B - - - -	.50	.55	.65	1.10
